

Give You A Private Space
In An Open Plan Office Environment

OFFICE &SPACE

Modern business office space is often characterized by the lack of space. Office space is a precious resource, and it's important to make the most of it. The soundproof pods are a great way to create a private space in an open-plan office environment. They are designed to be flexible and can be used in a variety of ways. They can be used as a meeting room, a phone booth, or a quiet workspace. They are also a great way to improve the acoustics of your office space. They can help to reduce noise and create a more productive environment. They are a great investment for any business looking to improve its office space.

Make Space Meaningful

It's the perfect work environment for important conversations, brainstorming, and not overlooking a critical detail. It's an important place for an entrepreneur. It's a place where ideas are shared, and decisions are made. It's a place where the soundproof pods provide a quiet and comfortable working environment.

Nearly Perfect

Unusual Design,
Can always bring out the feeling of heart,
Frontage intelligent sound insulation cabin,
It feels like you're in an extraordinary world.

Recorded Space

Recorded what happened to the work environment is quiet and not by the outside noise interference.
Frontage intelligent sound insulation cabin provides a quiet and comfortable working environment.

Intelligent Entrance Guard

Intelligent access control can be connected to the management system of attendance equipment, such as remote control and management. In the security management of the above, it is a great improvement. Based on the face recognition technology, access control is more accurate, and the security is more reliable. It can also be used to control access to the office space, such as the gate and the door, and it can be used to control access to the office space.

Easy Fit.

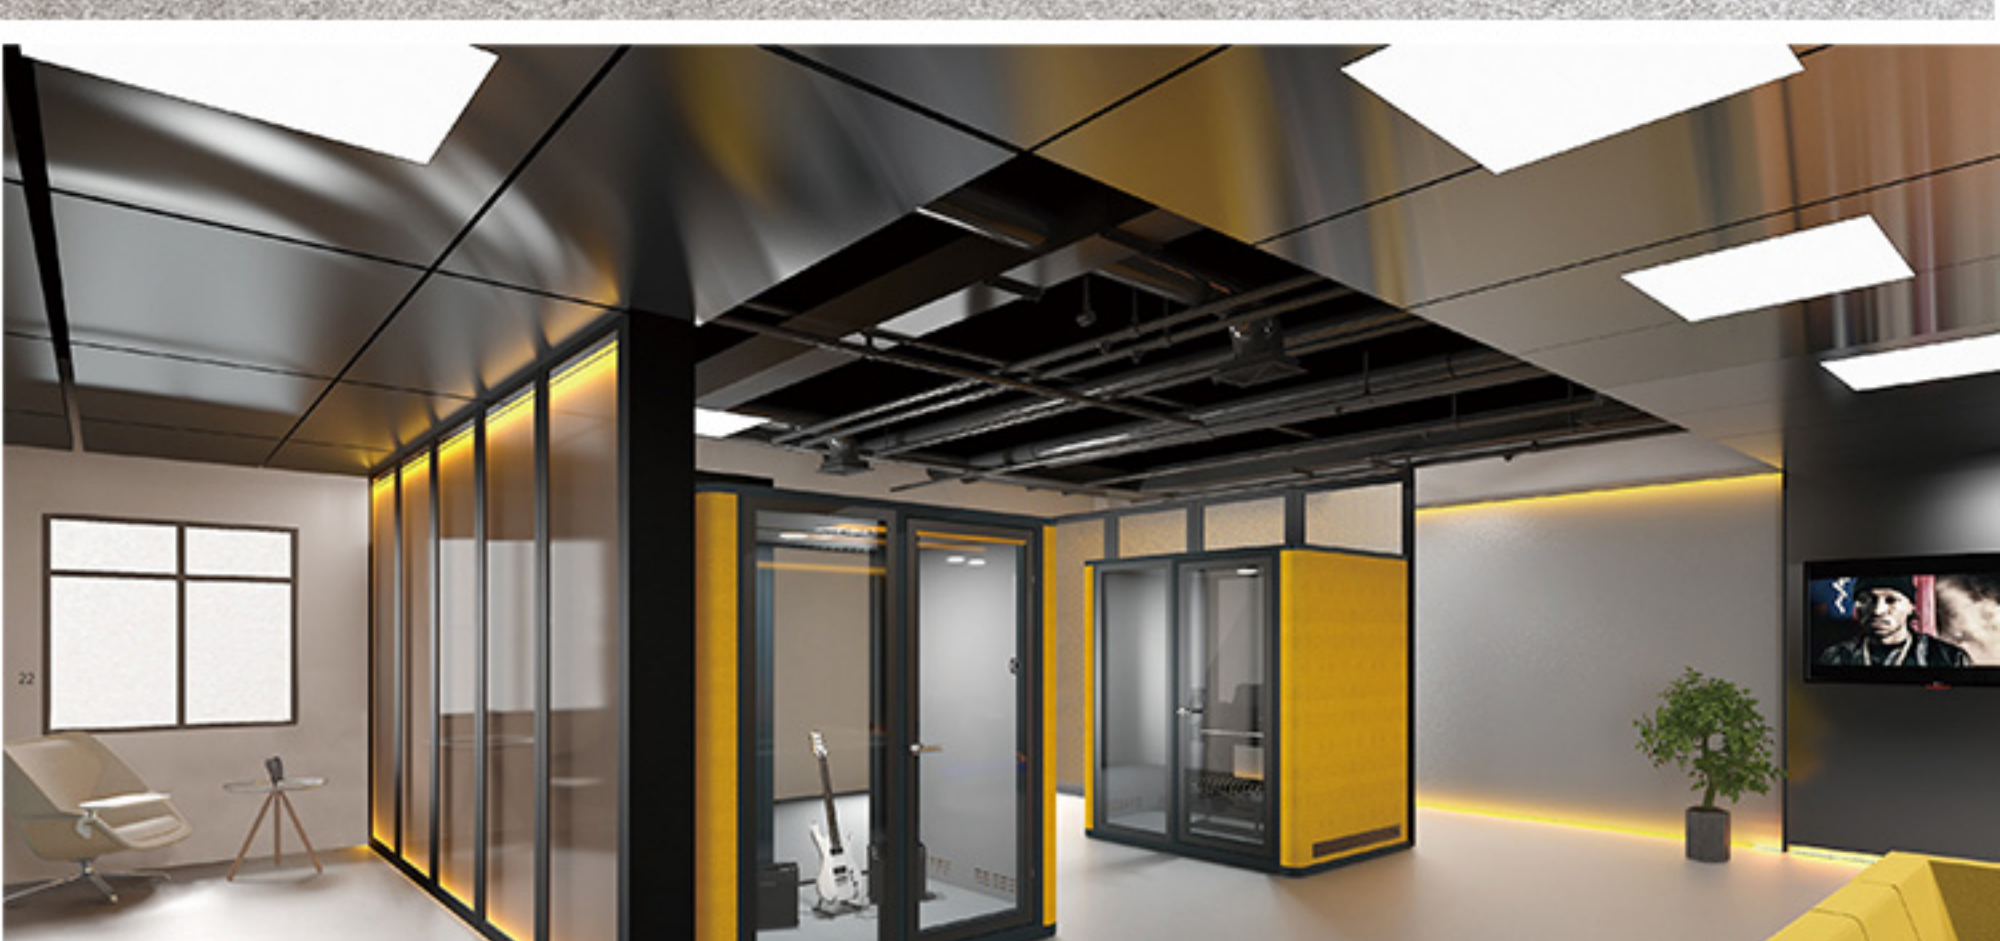

The soundproof pods are designed to be easy to fit into any office space. They are available in a variety of sizes and can be customized to fit your specific needs. They are also easy to install and can be moved around the office as needed. They are a great way to improve the acoustics of your office space and create a more productive environment.

Our Goal Is To
Create The Taste Of Work
— Design front way

EDUCATION &SPACE

Ideal Space Creator

Frontage intelligent sound insulation cabin provides a quiet and comfortable working environment.

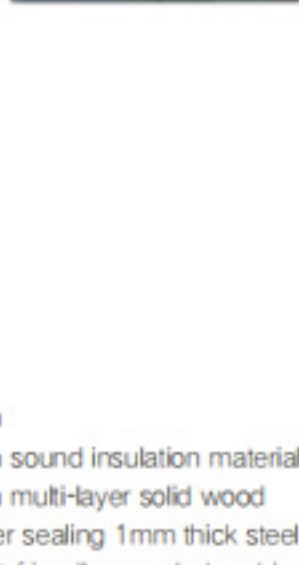

Structural Analysis

Countless test adjustments, composite sound insulation technology and materials ensure that you are not disturbed by the environment, and will not interfere with the surrounding environment.

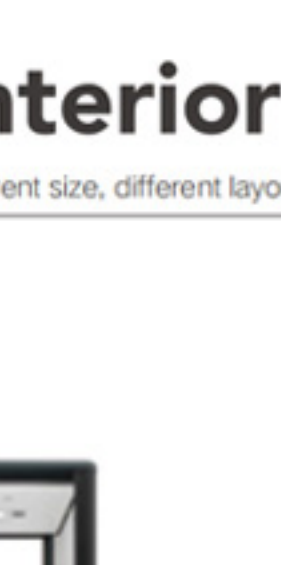

Glass
Toughen 5mm inside and 5mm outside
The double glass is filled with argon gas

Surface spraying
German brand Oxyplast powder

Within the framework
Cold-rolled iron plate or iron pipe is combined with aluminum profiles. To achieve the best balance of intensity and lightness

Exhaust system
The optional air conditioning exhaust system of the intelligent sound-proof cabin can reduce the sound interaction inside and outside the sound-proof cabin, and at the same time, it can also update the air inside the sound-proof cabin with low noise.

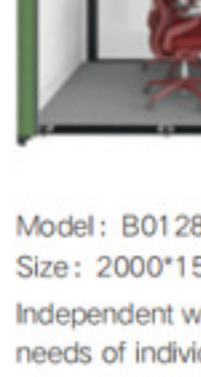

Sound insulation structure

- Sound-absorbing decorative covering cloth
- 5mm high density environmental protection sound insulation material
- 5mm high density environmental protection multi-layer solid wood
- 1.5mm wall thickness steel tube frame outer sealing 1mm thick steel plate
- Inside is filled with 50mm thick environment-friendly sound-absorbing cotton
- 9mm high density environmental protection multi-layer solid wood
- 9mm thick 6kg density environmental sound absorbing board

Interior Layout

Different size, different layout, suitable for more different space and scene.

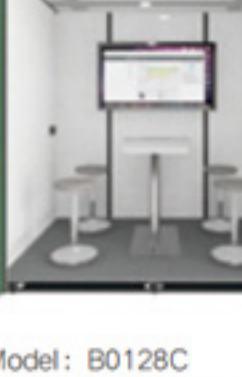

Model: B0128A
Size: 1100*1100*2195mm
Work alone, Privacy for phone calls

Model: B0128E
Size: 2000*1500*2195mm
Single-player recording room, suitable for online education and personal live broadcasting

Model: B0128B
Size: 2000*1500*2195mm
Independent working room, to meet the needs of individual independent work without disturbance

Model: B0128B
Size: 2000*1500*2195mm
Double independent desktop for two people to work together

Model: B0128B
Size: 2000*1500*2195mm
Suitable for four people business negotiation, private work discussion

Model: B0128C
Size: 2500*2500*2195mm
With a screen for business video display, video conference, remote discussion

Model: B0128C
Size: 2500*2500*2195mm
It is suitable for brainstorming and creative discussion, and for temporary meetings of many people

Model: B0128C
Size: 2500*2500*2195mm
Applicable to many business reception, and project discussion
