VOLTA

a completely different desk from the current trend
It gives the office space a relaxed
comfortable and atmospheric office environment

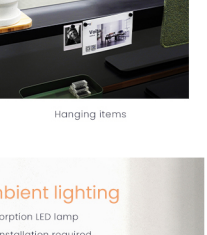

OUTSTANDING FEATURES

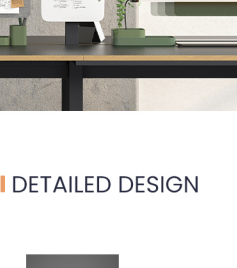

Adsorption sliding

Different from traditional employee desks, the Volta system desk is designed with two highlights: adsorption and sliding.

It allows the screen to slide freely on the metal hanging groove above the desktop through the built-in magnet

The magnetic force between its magnet and the metal hanging groove can increase the number of screens and make the movement very simple and convenient.

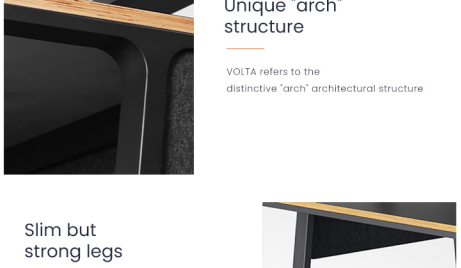

Storage board

Hanging items

Ambient lighting

- Adsorption LED lamp
- No installation required
- Inductive switch
- Flexible mobility

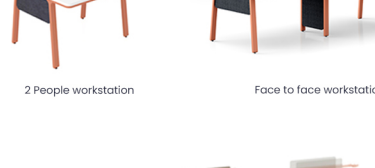

DETAILED DESIGN

Detailed display

Environmentally friendly
noisereducing material wiring system

Slender when viewed from the front
but strong when viewed from the side

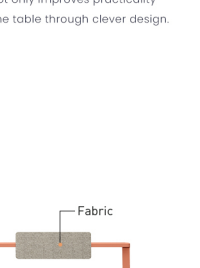

Unique "arch" structure

VOLTA refers to the distinctive "arch" architectural structure

Slim but strong legs

Unique visual design
steel legs Sturdy and reliable
making the visual style more spacious

Graceful lines

Incorporating novel, light arcs into the table legs, central toolbar, desktop edges and other areas creates a unique and contrasting sense of power and lightness

Cabling system

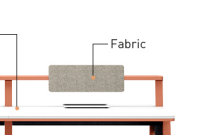

The desk is equipped with a PET cable hanging groove to meet the diverse line management needs of office equipment

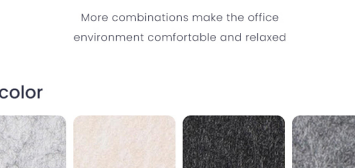

MATCH COMBINATION

2 People workstation

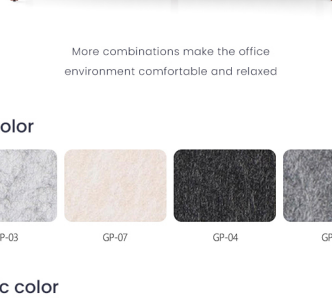

Face to face workstation

Extension table

Adding an extension unit balances functionality and aesthetics through "invisible expansion", which not only improves practicality but also becomes a visual highlight of the table through clever design.

COLOR ATCHING

More combinations make the office environment comfortable and relaxed
